About SpaceDreams

Founded in 2021 and based in Paris and Toulouse, SpaceDreamS is a spaceport architect. The company's mission is to enhance the competitiveness of launch systems by developing interoperable and modular launch pads. SpaceDreamS provides turnkey ground solutions for launch vehicles and spaceports, aiming to reduce the cost and time to access space.

A multiple laureate of the France 2030 program, SpaceDreamS is supported by the DGA, CNES, and ESA to foster the growth of its clients in France and Europe.

We are developing NuPad (Next-generation Universal Pad), the first interoperable launch platform adaptable to any type of launch vehicle, at various lifecycle stages, and capable of being transported between certified launch sites.

The TwinPad is the digital twin of the ground launch system. It facilitates the development of launcher and launch pad operations software, as well as virtual and real-time simulation of cryogenic, electrical, and mechanical fluid processes.

SpaceDreamS is also conducting preliminary studies on the development of ground support systems for several mini and micro launchers.

Job Description

The Project Manager is responsible for the end-to-end management of projects, from bid preparation to project closure.

They coordinate the team, manage resources, control costs and timelines, and ensure customer

satisfaction while respecting contractual obligations and quality standards. The Project Manager also oversees subcontractors.

Main Responsibilities:

Bid Management: Contributing to the analysis of client specifications and preparing bids in collaboration with technical and commercial teams.

Project Management: Organizing internal and external meetings, leading the team, managing schedules, risks, and ensuring quality, cost, and time objectives are met. Overseeing subcontractor activities in collaboration with the technical teams.

Reporting and Forecasting: Providing regular reporting, consolidating budget forecasts, and communicating key elements for the company's strategic objectives.

Business Development and Communication: Participating in market monitoring, internal and external communication, and promoting the company's offers and activities.

Company Image and Growth: Contributing to the company's reputation and its growth.

Profile

We are looking for a candidate who combines project management skills with technical expertise and has 3 to 5 years of significant experience.

You have experience in complex industrial environments (mechanical systems, fluids, control systems, industrial processes, operational sites, or industrial facilities) or a strong technical background.

You are comfortable managing projects with multiple stakeholders (clients, subcontractors, consortium partners), balancing sometimes conflicting interests, and managing subcontractors. You can assert your positions with clients while maintaining constructive relationships.

Skills

- **Technical:** Proficiency in project management tools (MS Project, TEAMS, MS Office, etc.), analysing specifications, structuring, and project planning.
- **Managerial:** Ability to coordinate and lead teams, manage risks and priorities.
- **Communication:** Excellent internal and external communication skills, regular reporting.

Personal Qualities

- Attentive to team members
- Inspiring leader
- Rigorous and organized
- Analytical and synthesizing mindset
- Responsive and adaptable

Experience and Education

- Higher education in project management, engineering, or equivalent.
- Proficiency in project management tools (MS Project, TEAMS, MS Office, etc.).

We offer

The opportunity to be part of a unique human and technical adventure within a diverse and experienced team.

Freedom of action and organization in your projects with appropriate resources.

A salary that matches your skills and the key role you will take on.

Additional social benefits.

A simple, efficient, and advantageous health insurance.

The possibility to work partially from home.
